Balustrades

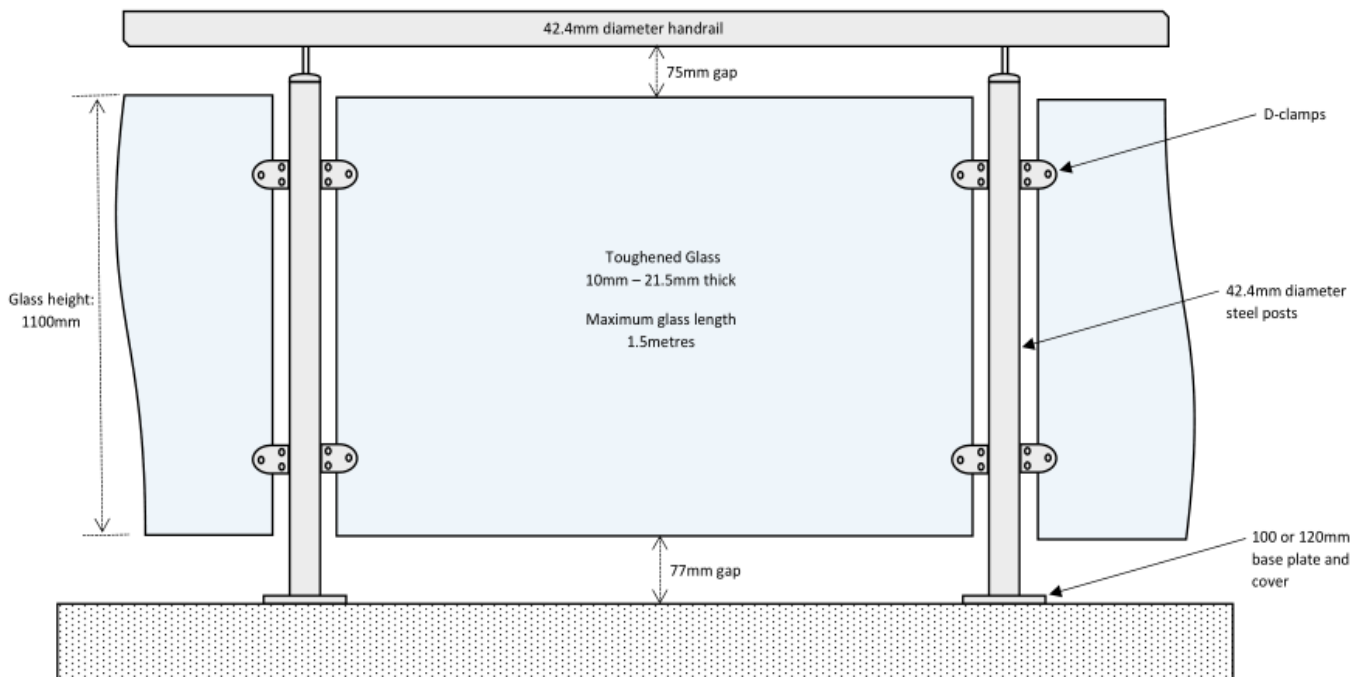

Juliet

The Juliet Balcony is one of our more popular choices. Create that open space feel with a simple but elegant solution. Enhance your view while letting fresh air into your living space. This balcony can be attached to most frames including wood, steel, aluminium and plastic.

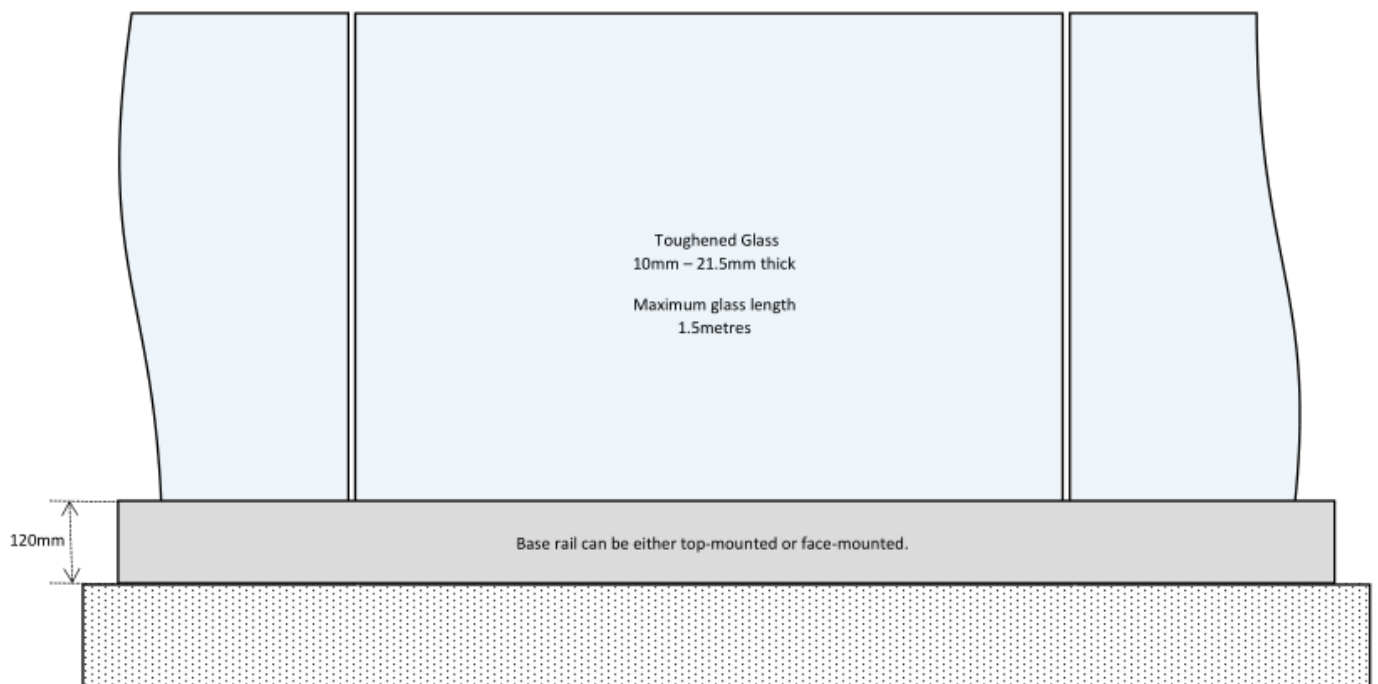

Post & Rail

Our Post & Rail balconies are created from quality steel fittings. Suitable for both indoor and outdoor areas, you are rewarded with a beautifully framed product that also provides the level of safety required to meet all regulations. Suitable for both residential and commercial applications.

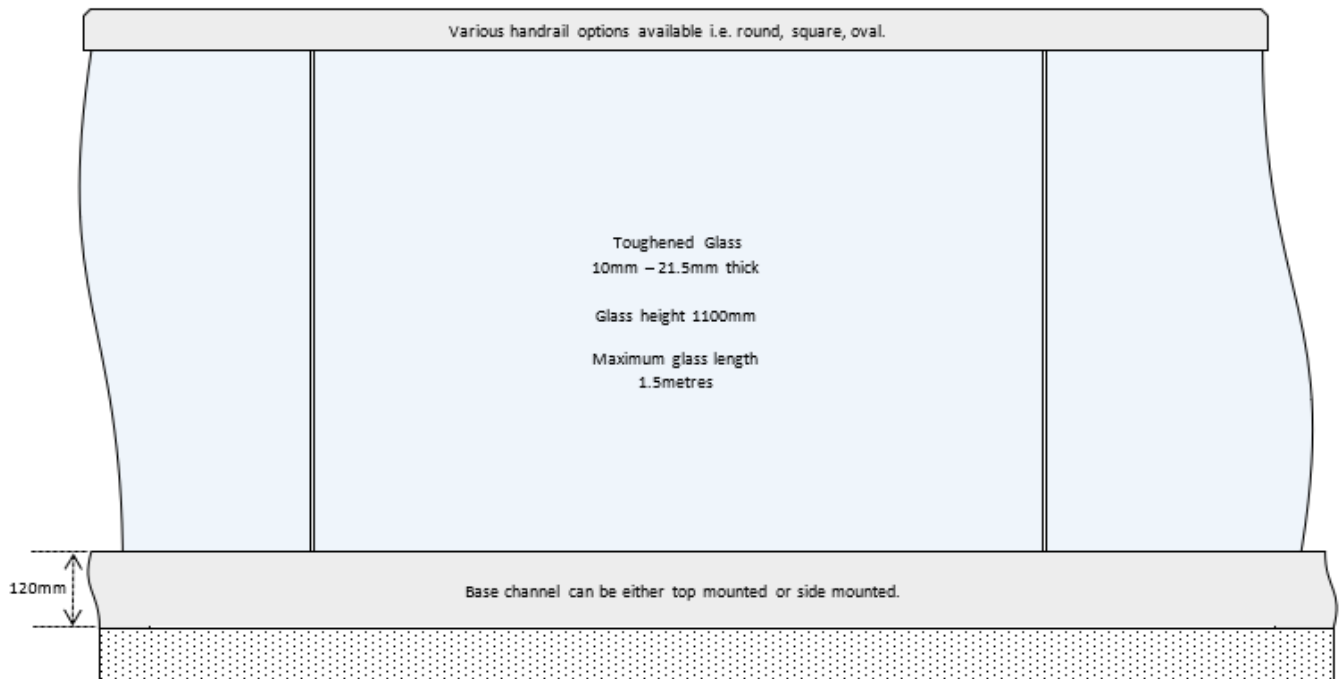

Frameless XV

Our Frameless XV balustrade is a great choice for providing uninterrupted views of your open space. The base rail can be attached to the top of the fixing structure or to the front for that completely frameless look.

Base & Rail

Our Base & Rail product allows you to have that compromise between the Post & Rail and Frameless balustrades. Have uninterrupted views while having that bordered finish with a top handrail. Suitable for both residential and commercial applications.

Button Fix

Our Button Fix balustrade offers an elegant look with the option of a top rail or if preferred, no rail for that frameless look. The 50mm button attachments comes in various thicknesses, offering a choice on the gap between the glass and the fixing structure.
